

# Overview of Lecture and Lab COURSE ASSIGNMENTS & DUE DATES FALL 2017

- Make sure that you stay on task. Because this is an online class you need to be very disciplined!!!!!! Also understand that this assignment page can change periodically. All changes that I make will update on Canvas on the syllabus and module pages. All work and assignments will be specifically in the weekly module on Canvas, but this will give an overview.
- Also, please remember that if you miss any assignment in the class, it counts as a zero and may affect your enrollment status in the course. The best success in any online class is staying on task (Do Not Get Behind.....because if you do, the class can be very overwhelming).
- Orientation will start during Week 1 and online lecture and lab content will start during Week 2.

Each week you will use your detailed module folder on Canvas to complete all content and assignments. Please complete the content in order as prepared in the module to increase your understanding. All assignments and attendance markers are due on **Monday 7am** each week. I will also provide a weekly checklist of all tasks to complete

# BIO 2514 ANATOMY AND PHYSIOLOGY I LECTURE AND LAB SCHEDULE OVERVIEW

DATE	LECTURE	TEXT	LAB
AUG 21-AUG 28	CLASS ORIENTATION CHAPTERS 2-3 ON YOUR OWN (THIS IS PREVIOUS CONTENT FROM GENERAL BIOLOGY I)	2-3	ORDER YOUR LAB KIT
